Re: LightSquared Subsidiary, LLC
Ex Parte Communication. IB Docket No. 11-109
IBSF File No. SAT-MOD-20101118-00239

Dear Ms. Dortch,

As a professional land surveyor I frequently use high-precision GPS in order to do my job. The results from the surveys I perform with high-precision GPS provide important data and information for many departments within my agency including: Engineering, Forestry, Realty, Hydrology, and Fisheries. The results of my surveys are used for many purposes including: road, trailhead and campground design, land exchanges, prevention and resolution of encroachments. I am very concerned about LightSquared's proposed plan interfering with the the GPS system. I oppose LightSquared's request for a license until positive proof is presented by qualified GPS experts that the proposed action will not affect GPS users.

Thank You,

Rebecca J. Cate
